Education

Ph.D. in Physics

MASSACHUSETTS INSTITUTE OF TECHNOLOGY

• C.G.P.A - 5.0/5.0

Specialization: Condensed Matter Theory

Supervisor: Prof. Leonid Levitov

Cambridge, MA, USA

August 2022 - Ongoing

Master of Science in Physics

INDIAN INSTITUTE OF SCIENCE

• C.G.P.A - 9.8/10.0

Bangalore, India

Aug. 2021 - Jun. 2022

Bachelor of Science (Research) in Physics

INDIAN INSTITUTE OF SCIENCE

• C.G.P.A - 9.8/10.0

Bangalore, India

Aug. 2017 - Jun. 2021

Research Articles

- **A. Panigrahi**, L. Levitov; *Signatures of electronic ordering in transport in graphene flat bands* [Phys. Rev. B **110**, 035122 \(2024\)](#)
- M. Masseroni, M. Gull, **A. Panigrahi**, N. Jacobsen, F. Fischer, C. Tong, J. D. Gerber, M. Niese, T. Taniguchi, K. Watanabe, L. Levitov, T. Ihn, K. Ensslin, H. Duprez; *Spin-orbit proximity in MoS_2 /bilayer graphene heterostructures* [arxiv:2403.17120](#) (Under review in Nature Communications)

Research Experience

Transport in ordered phases in graphene

WITH PROF. LEONID LEVITOV

- Predicted that momentum-polarized nematic phases in biased bilayer graphene can lead to resistance decreasing with rising temperature
- Demonstrated hysteresis-like switching behavior under the action of a strong electric field

MIT, Cambridge, MA, USA

2023 — Present

Many Body Localization (MBL) and thermalization of interacting quantum spin chain

WITH PROF. SUBROTO MUKERJEE

- Studied how the Out-of-Time Ordered Correlator (OTOC) behaves for MBL and thermal systems
- Studied behavior of OTOC in MBL systems with random and incommensurate potential, with and without interaction

IISc, Bangalore, India

(Master's thesis)

September 2021 - April 2022

Topological phases in projected lower dimensional branes

JOINTLY WITH PROF. BITAN ROY AND PROF. VLADIMIR JURIČIĆ

- Numerically studied how topological properties of parent systems emerge in projected crystals and Fibonacci quasicrystals
- Verified the existence of dislocation modes, Weyl points, and Landau levels in projected crystals and quasicrystals
- Proposed how this method can be utilized to study higher dimensional (>3D) topological phases within 3D systems

MPIPKS, Dresden, Germany

(remotely)

June 2021 - September 2021

Berry curvature effects on thermoelectric transport

WITH PROF. SUBROTO MUKERJEE

- Studied how Berry curvature can alter thermoelectric transport, leading to anomalous Hall and anomalous Nernst effects
- Studied the Boltzmann transport formalism
- Studied how the Onsager relation can be demonstrated from microscopic theories for a system with a non-trivial Berry curvature
- Found a condition on the energy magnetization such that the Einstein relation holds for the transport energy current in these systems
- Showcased a physical interpretation of this condition, and obtained a closed expression for energy magnetization
- Analytically solved the Boltzmann transport equation (including Berry curvature effects) for two-dimensional systems

IISc, Bangalore, India

(Bachelor's thesis)

October 2020 - June 2021

Non-Hermitian Topological Insulators and Dislocations

MPIPKS, Dresden, Germany

(remotely)

May 2020 - September 2020

WITH PROF. BITAN ROY

- Studied and numerically implemented SSH Model, Chern Insulators, Quantum Spin Hall Insulators
- Studied the effects of dislocation in Hermitian and Non-Hermitian Chern Insulators
- Obtained phase diagrams for regimes where topological states get pinned at dislocation centers
- Proposed how dislocations can be used to probe topological phases in non-Hermitian systems, where the non-Hermitian skin effect masks the traditional bulk-boundary correspondence

Research Interests

Broadly interested in theoretical Condensed Matter Physics

- Electronic transport in two-dimensional systems and the effects of Berry curvature in transport
- Computational methods in quantum condensed matter physics
- Topological phases of matter and Quantum Phase transitions
- Thermalization of quantum systems and Many body localization

Skills

Programming skills Julia, MATLAB/Octave, Mathematica, Python

Advanced Physics Courses Strongly Correlated Systems, Advanced Statistical Physics, Quantum Field Theory I, General Relativity

Languages Fluent in English, Bengali, Hindi

Talks

Transport Signatures of Electronic Ordering in Graphene Flat Bands

Indian Institute of Science,

Bangalore, India

January 2024

CLICK [HERE](#) TO DOWNLOAD THE PRESENTATION

Topological phases in quasicrystals: A general principle of construction

APS March Meeting (virtually)

March 2022

CLICK [HERE](#) TO DOWNLOAD THE PRESENTATION

Dislocation as a bulk probe of non-Hermitian topology

MPIPKS, Dresden, Germany

(remotely)

July 6, 2021

CLICK [HERE](#) TO DOWNLOAD THE PRESENTATION

Teaching Experience

Physics II: Electricity and Magnetism

MIT

TEACHING ASSISTANT

Feb - May 2024

- Taught students one-on-one in office hours and graded exams

Academic Achievements

| | | |
|---------|---|--------------------|
| 2023 | Qualified among the top 16 participants in MIT Integration Bee | MIT |
| 2022 | 1st Rank in India in CSIR-NET (JRF) in Physics (score 186/200) | India |
| 2022 | 1st Rank in India in Graduate Aptitude Test in Engineering (G.A.T.E.) in Physics | India |
| 2017-22 | C.G.P.A 9.8/10 in B.S. (Research) and M.S., highest GPA in batch | IISc, Bangalore |
| 2017 | 1st rank (99.2 %) in Board in Higher Secondary Examination, among about 0.7 million candidates | West Bengal, India |
| 2015 | 2nd rank (97.57 %) in Board in Secondary Examination, among about 1 million candidates | West Bengal, India |
