

Archisman Panigrahi

Graduate Student (Ph.D. Candidate) · Physics

Massachusetts Institute of Technology, Cambridge, MA, USA

+1 (857) 706-9484 | archi137@mit.edu | [archisman-panigrahi.github.io](https://github.com/archisman-panigrahi) | [Google Scholar](#)

Education

Ph.D. in Physics (ongoing)

MASSACHUSETTS INSTITUTE OF TECHNOLOGY

Cambridge, MA, USA

August 2022 - Ongoing

- C.G.P.A - 5.0/5.0

Supervisor: Prof. Leonid Levitov

Master of Science in Physics

INDIAN INSTITUTE OF SCIENCE

Bangalore, India

Aug. 2021 - Jun. 2022

- C.G.P.A - 9.8/10.0

Bachelor of Science (Research) in Physics

INDIAN INSTITUTE OF SCIENCE

Bangalore, India

Aug. 2017 - Jun. 2021

- C.G.P.A - 9.8/10.0

Research Articles

LISTED IN THE CHRONOLOGICAL ORDER OF THEIR APPEARANCE ON ARXIV.

- **A. Panigrahi**, V. Poliakov, L. Levitov; *Particle-Hole Ghost Interference in Superconductors* [arXiv:2606.06437](#)
- Y. Liao, A. Grankin, **A. Panigrahi**, V. Galitski, L. Levitov; *Tunable viscosity across the BCS-BEC crossover* [arXiv:2604.10759](#)
- **A. Panigrahi**, D. Kaplan; *Valley polarization of chiral excitonic bound states induced by band geometry* [arXiv:2604.05222](#)
- P. Zhu, **A. Panigrahi**, L. Levitov, N. Trivedi; *Strain Response as a Probe of Spinons in Quantum Spin Liquids* [arXiv:2512.03137](#)
- **A. Panigrahi**, B. Roy; *Projected branes as platforms for crystalline, superconducting, and higher-order topological phases* [PRB 113, 035301 \(2026\)](#)
- **A. Panigrahi**, V. Poliakov, L. Levitov; *Tomographic imaging of superconducting order using particle-hole interference* [PNAS 123 \(27\) e2534730123 \(2026\)](#)
- **A. Panigrahi**, A. Kumar; *Non-Fermi Liquids from Subsystem Symmetry Breaking in van der Waals Multilayers* [PRL 134, 236502 \(2025\)](#)
- **A. Panigrahi**, V. Poliakov, Z. Dong, L. Levitov; *Spin chirality and fermion stirring in topological bands* [arxiv:2407.17433](#)
- L. Holleis, T. Xie, S. Xu, H. Zhou, C. L. Patterson, **A. Panigrahi**, T. Taniguchi, K. Watanabe, L. S. Levitov, C. Jin, E. Berg, A. F. Young; *Fluctuating magnetism and Pomeranchuk effect in multilayer graphene* [Nature 640, 355–360 \(2025\)](#)
- M. Masseroni, M. Gull, **A. Panigrahi**, N. Jacobsen, F. Fischer, C. Tong, J. D. Gerber, M. Niese, T. Taniguchi, K. Watanabe, L. Levitov, T. Ihn, K. Ensslin, H. Duprez; *Spin-orbit proximity in MoS_2 /bilayer graphene heterostructures* [Nat Commun 15, 9251 \(2024\)](#)
- **A. Panigrahi**, L. Levitov; *Signatures of electronic ordering in transport in graphene flat bands* [PRB 110, 035122 \(2024\)](#)
- **A. Panigrahi**, V. Juričić, B. Roy; *Projected Topological Branes* [Commun Phys 5, 230 \(2022\)](#)
- **A. Panigrahi**, S. Mukerjee; *Energy magnetization and transport in systems with a non-zero Berry curvature in a magnetic field* [SciPost Phys. Core 6, 052 \(2023\)](#)
- **A. Panigrahi**, R. Moessner, B. Roy; *Non-Hermitian dislocation modes: Stability and melting across exceptional points* [PRB 106, L041302 \(2022\)](#)

Working papers

EXPECTED TIME OF COMPLETION: AUGUST—OCTOBER 2026. TITLES ARE TENTATIVE.

- **A. Panigrahi**, V. Poliakov, L. Levitov; *Effects of two-impurity interference in superconductors with a van-Hove singularity*
- V. Poliakov, **A. Panigrahi**; *Fork-tip Josephson STM as a direct probe of topological superconductivity*
- K. Nazaryan, **A. Panigrahi**; *Viscchiral Transport: Chiral Selection of Hydrodynamic Vortices by Berry Curvature*
- **A. Panigrahi**, C. Huang; *Microscopic theory of collective modes in superconductor: magic mode at $N = 4$ -layer rhombohedral graphene*
- **A. Panigrahi**, B. Roy; *Topological phase transitions in dilute projected amorphous branes*

Research Experience

Effects of Berry curvature in collective modes in chiral superconductors

MIT, Cambridge, MA, USA

WITH PROF. CHUNLI HUANG (2026)

- Found a new class of collective modes in chiral superconductors in N-layer rhombohedral graphene that arise due to form factors or quantum geometry, only in $N = 4$.

Deducing symmetry properties and topological phase winding of unconventional superconductors with STM

MIT, Cambridge, MA, USA

WITH PROF. LEONID LEVITOV AND VLADISLAV POLIAKOV (2024 — PRESENT)

- Developed a theory of particle-hole interference near a pair of impurities to probe the symmetries and topological phase winding of order parameters of unconventional superconductors
- Extended the proposal to realistic unconventional superconductors such as Strontium Ruthenate
- Developed similar STM probes for detecting topological superconductivity with coupled superconducting STM tips and with spin-sensitive STM measuring the spin-chirality of the system.

Strain induced gauge fields as a probe of quantum spin liquids

MIT, Cambridge, MA, USA

WITH PROF. NANDINI TRIVEDI, PROF. LEONID LEVITOV, AND PENGHAO ZHU (2024 — PRESENT)

- Developed a controlled method for calculating strain susceptibility of Kitaev Spin Liquids (KSL) and Chiral Spin Liquids (CSL), as a part of a project establishing that the strain response can be utilized to distinguish KSL, CSL and Intermediate Gapless Phases.

Marginal Fermi liquids resulting from subsystem symmetry breaking

MIT, Cambridge, MA, USA

WITH AJESH KUMAR (2024)

- Demonstrated that subsystem symmetry breaking in van der Waals heterostructures can give rise to an anisotropic marginal Fermi liquid, with quasiparticle lifetime $\tau \sim \frac{1}{|\omega| \log|1/\omega|}$ and specific heat $C \sim T[\log(1/T)]^2$.
- Developed and implemented a Hartree-Fock calculation to determine the parameter regime in which the anisotropic marginal Fermi liquid can arise in realistic systems.

Transport in isospin-ordered phases in graphene

MIT, Cambridge, MA, USA

WITH PROF. LEONID LEVITOV (2023 — 2024)

- Predicted that momentum-polarized nematic phases in biased bilayer graphene can lead to resistance decreasing with rising temperature
- Demonstrated hysteresis-like switching behavior under the action of a strong electric field

Topological phases in projected lower dimensional branes

MPIPKS, Dresden, Germany
(remotely)

JOINTLY WITH PROF. BITAN ROY AND PROF. VLADIMIR JURIČIĆ (JUNE 2021 - SEPTEMBER 2021)

- Showed the existence of dislocation modes, Weyl points, and Landau levels in lower-dimensional projected crystals and Fibonacci quasicrystals
- Proposed how this method can be utilized to study higher dimensional (>3D) topological phases within 3D systems

MIT, Cambridge, MA, USA

WITH PROF. BITAN ROY (2025 — PRESENT)

- Established that projected branes can serve as a platform for hosting crystalline, superconducting, and higher-order topological phases.
- Found a new class of quantum phase transition in dilute projected amorphous branes that is distinct from disorder induced transitions in quantum Hall systems.

Research Interests

Broadly interested in theoretical Condensed Matter Physics

- Tunneling phenomena in unconventional superconductors and in superconductors with broken time-reversal symmetry
- Electronic transport in two-dimensional systems and the effects of Berry curvature in transport
- Non-Fermi Liquids emerging due to subsystem symmetry breaking
- Probes for Quantum Spin Liquids
- Topological phases of matter and Quantum Phase transitions

Skills

Programming skills Julia, MATLAB/Octave, Mathematica, Python

Advanced Physics Courses Strongly Correlated Systems, Advanced Statistical Physics, Quantum Field Theory I, General Relativity

Languages Fluent in English, Bengali, Hindi

Talks

Inducing chiral bound states in multilayer graphene via Berry curvature: analytical and numerical approach

APS March Meeting, Denver, CO

July 6, 2021

Teaching Experience

Theory of Solids II (8.512)

TEACHING ASSISTANT

MIT

Spring 2026

- Conducted recitation classes on various topics in condensed matter physics

Physics II: Electricity and Magnetism (8.102)

TEACHING ASSISTANT

MIT

Spring 2024

- Taught students one-on-one in office hours and graded exams

Academic Achievements

2022	1st Rank in India in CSIR-NET (JRF) 2021 in Physics, held in February 2022 due to COVID (score 186/200)	India
2022	1st Rank in India in Graduate Aptitude Test in Engineering (G.A.T.E.) in Physics	India
2017-22	CGPA 9.8/10 in B.S. (Research) and M.S., received Prof. R. Srinivasan Medal for highest CGPA in batch	IISc, Bangalore
2017	1st rank (99.2 %) in Board in Higher Secondary Examination, among about 0.7 million candidates	West Bengal, India
2015	2nd rank (97.57 %) in Board in Secondary Examination, among about 1 million candidates	West Bengal, India
